Professional Summary

Full Stack Web Developer skilled in Node.js, Express.js, MongoDB, MySQL, and React.js. Proven ability to design, build, and deploy responsive, secure, and scalable web applications. Strong foundation in JavaScript, RESTful APIs, MVC architecture, and automated testing. Eager to leverage hands-on project experience to contribute to high-quality software development as a Full Stack / Software Engineer.

Education

Einstein Academy of Technology and Management, Khordha **Aug 2024 – Jun 2027**
Bachelor of Technology in Computer Science Engineering (CGPA: 7.5)

S.K.D.A.V Government Polytechnic, Rourkela **Aug 2021 – Jun 2024**
Diploma in Information Technology (68.51%)

Technical Skills

Frontend: HTML5, CSS3, EJS, React.js, Bootstrap, Tailwind

Backend: Node.js, Express.js, RESTful APIs, MVC Architecture

Databases: MongoDB, MySQL

Languages: Java, JavaScript

Tools: Git, GitHub, VS Code, Eclipse, Hoppscotch

Deployment: Render, Vercel

Testing: Manual Testing, Automation Testing, Selenium WebDriver

Projects

Scan2Exit – EGI Gate Pass

- Developed an Android-based Gate Pass Management System for students, admins, and campus security.
- Built frontend using React Native and developed backend APIs using Node.js and Express.js.
- Designed and managed MongoDB database for student registration, authentication, and pass records.
- Implemented role-based access with admin verification for student account approval and login.
- Developed a QR code-based leave pass system with security scanning and automatic expiry after expected return time +30 minutes.
- Added manual entry and history tracking features for security and admin monitoring of student movements.

Scan2Know – Hostel Room Information System

- Developed a Smart Room Member Information System for hostels, enabling instant access to student details through QR code scanning outside each room.
- Built frontend using React.js and backend using Node.js and Express.js.
- Designed an admin panel to manage and view all student and room data efficiently.
- Automated data collection via Google Forms and processed responses using Google Apps Script.
- Converted Excel form responses into JSON format for seamless backend integration.
- Enabled QR code generation and download functionality for each room.

AKStore – Full Stack E-commerce Website (Myntra Clone)

- Developed a full-stack e-commerce web application using Node.js, Express.js, MongoDB, Mongoose, and EJS.
- Implemented user authentication, authorization, session management, and secure routing.
- Built CRUD operations for product management with MongoDB integration.
- Designed cart and order management system with dynamic pricing logic.
- Created seller dashboard for managing products, pricing, and discounts.
- Followed MVC architecture with modular code and error handling.

NextHub – Airbnb Clone

- Developed a full-stack Airbnb clone using Node.js, Express.js, MongoDB, and EJS.
- Implemented MVC architecture and RESTful APIs for scalable backend development.
- Built dynamic property listing, booking, and user interaction features.
- Integrated MongoDB for efficient data storage and retrieval.
- Designed responsive UI using EJS templating for seamless user experience.

Certifications

- Introduction to Front-End Development – Meta (Coursera)
- Web Development with HTML, CSS, JavaScript – IBM (Coursera)
- Software Testing – NIIT Foundation

Hackathons & Competitions

- BPUT Hackathon – Zonal Level (Oct 2025)
- INSPRANO Hackathon – Government College of Engineering, Kalahandi (Oct 2025)
- Adastra 2025 Hackathon – Einstein Academy of Technology and Management, Khordha (Feb 2025)
